mid of august 2002 the band booked two weeks of time in IWF studios - hannover to record a new record with producer willi dammeier. willi worked with german bands like guano apes or rapper ferris mc who are not our faves but hit german top 10 several times. he also became famous for his productions with indie/punk and alternative bands and for his cool natural underground sounds. the current record „rigor mortis“ gets promotion by bluNoise records (blackmail, scumbucket, union youth). as you see there is just a booking-agency we are searching for helping us with additional booking. the demo-version (!)of „your love“ was chosen to be best new song of a newcomer contest last year at project radio digital 89.0 and got airplay from several underground and campus-radios.

german readers of metal-mag „rock hard“ voted for them as the best newcomer of the month 2 times (7 + 8 2002).
